

## PayPal WPP Installation Instructions

To get the copy of your creloaded PayPal wpp module, you need to login to <http://creloaded.org> . Click on the **Extension** on the left navigation bar, then on **Payment**.

You will get the list of all supported gateways of creloaded. You need to download “PayPal Website Payments Pro (WPP) Payment Module”

You need to save the zip file on your local computer. Get it unzipped. Connect to your FTP client, browse to the path where you have unzipped the PayPal wpp module files.

You will get the following file structure once you unzip the PayPal wpp module zip file: **"D:\paypal\_wpp\paypal\_wpp\catalog"** . You will get 2 folders under the catalog folder, images and includes.

You can see that in the screen shot below.

```

Command: TYPE I
Response: 227 Entering Passive Mode (208,109,51,156,175,181).
Command: LIST
Response: 150 Here comes the directory listing.
Response: 226 Directory send OK.
Status: Directory listing successful
Command: TYPE I
Response: 200 Switching to Binary mode.

```

Local Site: D:\paypal_wpp\paypal_wpp\catalog\				Remote Site: /public_html/		
Filename	Filesize	Filetype	Last Modified	Filename	Filesize	Filetype
..				..		
images		File Folder	4/6/2009 10:08...	admin		File Folder
includes		File Folder	4/6/2009 9:38 AM	cache		File Folder
				cert		File Folder
				cgi-bin		File Folder
				debug		File Folder
				doc		File Folder
				download		File Folder
				ext		File Folder
				images		File Folder
				includes		File Folder

2 folders.

20 folders and 185 files with 1183999 bytes.

Local Filename	Size	Direction	Remote Filename	Host	Status
----------------	------	-----------	-----------------	------	--------

Once you browse to the catalog folder in FTP, you just need to simply select both the folders (images and includes) and upload it in your cart root folder, in the above example cart files are located in public\_html, the path may vary depending on your cart files on the server. You may need to overwrite some existing files on your server.

**Note : Please take the backup of your cart files.**

Once the files get uploaded on the server, login to your cart admin panel, navigate to Modules >> payment, you will see the PayPal WPP there, click on it and get it installed.

The screenshot shows the admin panel for CRE Loaded Commercial Open Source. The main content area is titled "Payment Modules" and lists several payment options:

- PCI/PA-DSS Modules
- PCI Credit Card via CRE Secure
- Free Charge Card
- Check/Money Order
- Certified PayPal WPP/Express Payment** (highlighted)
- Bank Transfer

On the right side, there is a section for "Certified PayPal WPP/Express Payment" with an "Install Module" button and "Credit Card Test Info" (CC#: 4111111111111111, Expiry: Any).

The left sidebar contains a navigation menu with categories like Administrator, Configuration, Product Catalog, Customers/Orders, Marketing, Vouchers/Coupons, Reports, Data Manager, Content Director, Article Manager, Design Controls, Links Manager, Modules (with sub-items: Payment, Shipping, Order Total, Checkout Success, Add-Ons), Locations/Taxes, Localization, and Tools.
